EDUCON2021 Special Session

Special Session GinEE – Games in Engineering Education

GinEE

Overview
Today, electronic games are more than just pastimes – they are platforms through which we experience virtual situations, try out strategies, and develop respectively simulate new ideas. Game-Based Learning is set to grow rapidly in the near future. Its wide range of engineering applications includes automotive, aerospace and systems engineering, medicine, banking, and management. In this context, games are successful educational approaches, mainly when they are built on one of today’s well-established didactic frameworks aiming at strengthening self-regulated personalized learning.

This Special Sessions (GinEE) within the EDUCON 2021 Conference, April 2021, Vienna, Austria, aims to cover all aspects of gamification including game-based learning, applications of didactic frameworks, games engineering, serious games, storytelling, user studies, development of non-technical skills / meta-cognitive skills, simulation, learning scenarios based on virtual worlds, project-based learning – capstone projects, game-based learning arrangements, tools and applications for developing games in engineering education, experience reports, teaching cases, methodologies, personalization approaches as well as any work in progress. Our main goal is to bring together stakeholders for exchanging ideas and experiences and encouraging networking between academia and industry.

Topics
Authors are invited to submit complete papers for the GinEE special session (no abstracts needed). The topics cover all aspects of gamification applied to any learning process, including but not limited to the following:

- Game-based learning
- Application of didactic frameworks
- Gamification
- Games engineering
- Serious games
- Digital transformation
- Storytelling
- Usability Studies
- Development of non-technical skills / meta-cognitive skills
- Simulation
- Learning scenarios based on virtual worlds
- Project-based learning – capstone projects
- Game-based learning arrangements
- Development Tools for games
• Applications of games in engineering education
• Experience reports
• Teaching cases
• Methodologies
• Personalization approaches
• Remote / distance / online learning

Program Committee

Chair(s)
Matthias C. Utesch (chair), Chair for Information Systems, Technical University of Munich, Germany, utesch@in.tum.de
Klaus-Tycho Foerster (co-chair), Faculty of Computer Science, University of Vienna, Austria, klaus-tycho.foerster@unive.ac.at

Members
François Bry, Institute for Informatics, University of Munich, Germany
Matthias Gottlieb, Chair for Information Systems, Technical University of Munich, Germany
Isabel John, Computer Science, University of Applied Science Würzburg Schweinfurt (FHWS) Germany
Marek Milosz, Faculty of Electrical Engineering and Computer Science, Lublin University of Technology, Poland
Filomena Soares, R&D Algoritmi Center, University of Minho, Portugal
André Thomas, Department of Visualization, Texas A&M University, United States of America
Thrasyvoulos Tsiatsos, Department of Informatics, Aristotle University of Thessaloniki, Greece
