The main goal of the International Society for Engineering Education Special Track @ EDUCON 2014 is to offer an open discussion and a reflection in the use of Information Technologies in Engineering Education and their appropriate Pedagogy. It also intends to foster the involvement in continuing education, bridging the gap between higher education and learning on the workplace by focusing the IT use on lifelong learning and training. At K-12 levels this session intends to evaluate the impact of IT in fostering the engagement of younger people in the field of science, technology, engineering and math (STEM). At any level it is important to evaluate the IT power in facilitating the collaborative work everywhere. Finally, it is relevant to consider the IT potentiality in improving engineering education conditions in developing countries and for those people with special needs.

The topics include (but are not limited to):

- Computer Education Theory and Technology
- IT and Pedagogy
- Computers in Engineering Education
- Online Tools to Engage Students
- Tools for Higher Order Thinking Skills
- Multimedia for Education
- Mobile Devices in Education
- Online Labs
- Haptic Devices
- Serious Games
- Virtual and Augmented Reality Tools
- Intelligent Tutoring Systems
- Technological Innovation, Product Innovation and Industrial Innovation
- IT and Education Tools for People with Special Needs
- Using Information Technology in STEM Education
- Sharing Resources with Developing Countries
